

## Devmountain Foundations Capstone Project: Musicality

Musicality is a project that allows you to add songs with by adding a song title, artist, an image URL and video URL of your choosing to create a custom playlist for everyone. It also allows you to click on a link to visit the video URL's and delete any song we no longer desire on the playlist.

Features:

- Get my default 5 song playlist.
- Add any songs you would like.
- Delete any songs we no longer desire on the playlist.
